DETAILED ACTION

According to 37 CFR 1.142(a), a restriction requirement "will normally" be made before any action upon the merits; however, it may be made at any time before final action **." This means the examiner should make a proper requirement as early as possible in the prosecution, in the first action if possible, otherwise, as soon as the need for a proper requirement develops.

Therefore, a restriction requirement is made in response to claims 54-99 are added in addition to existing claims 8-14.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 8-14, 54-74 drawn to determine network configuration , classified in class 370, subclass 254.

II. Claims 75-99 drawn to determine communication parameters , classified in class 370, subclass 252. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions require different searches.
